

The NAB has absolutely no reason to exist in this society. They are a relic of the 50s and suck up our tax dollars to keep the pockets of rich white men stuffed with cash. If they feel threatened by this new technology, then they need to GET ANOTHER JOB!! They are scared because they are going to run out of fat to chew. I am a full supporter of the uncensored satellite radio. If they cannot compete with it, then they need to figure out how to make their service better to be an actual competitor with satellite radio. I paid my \$300 for my satellite radio equipment, everyone else gets their radio free, when it costs me \$10 a month. I don't exactly see how it poses a serious threat to public radio.
